• Organizing an event

Project Management - It is the application of knowledge, skills, tools and techniques to project activities in order to meet project requirements of knowledge, skills, tools and techniques to project activities in order to meet project requirements effectively and efficiently.

Characteristics of project Management:

i) Temporary Nature
Every project has a definite start and end.

ii) Unique output
Each project produces a distinct product or service

iii) Defined objectives.
Projects have specific goals and deliverables.

iv) Resource Constraints.
Limited time, cost, manpower and materials.

v) Risk and uncertainty.
projects involve uncertainties and risks.

e) Write a short Note on PMBOK

→ PMBOK (project management Body of knowledge project Management Institute defines PMBOK as a standard guide that provides best practices, guidelines, and processes for project manggement

Key Features:-

- A Globally recognized standard
- provides a framework for managemegnt projects.
- Used across industries.

PMBOK Process Groups:

1. Initiating
2. Planning
3. Executing
4. Monitoring and Controlling
5. Closing

Knowledge Areas:

- Integration management
- Scope manage ment
- Schedule management
- Cost management
- Quality management
- Resource management
- Communication management
- Risk management

3) Explain ITPM

→ ITPM (Information Technology project Managem
ITPM refers to the application of project management principles in the field of Information technology projects, such as software development, networking and database systems.

Characteristics of ITPM:

1) Technology Driven
2) Complexity
3) Rapid changes
4) Risk Involvement
5) User Centric approach.

Conclusion:

ITPM ensures that IT projects are completed successfully within time, cost and quality constraints.

Q.4) What is the role of RFP? describe its content and purpose.

→ RFP (Request for proposal) is a formal document issued by an organization to invite vendors or suppliers to submit proposals for a specific project.

Role of RFP:

- Helps in selecting the best vendor or contractor
- Clearly defines project requirements
- Ensures transparency in selection process
- Enables comparison of different proposals

Contents of RFP:

1) Introduction
   Background of organization
2) Project Description
   · Detailed explaination of project
3) Scope of work
   - Tasks and deliverables expected
4) Functional and technical Requirements.
   · System requirements and specifications
5) Budget Information
   · Estimated cost or financial Constraints
6) Timeline
   · project schedule and deadlines
7) Evaluation Criteria
   · Basis on which proposal are evaluated.
8) Terms and Conditions.
   · Legal agreements and NDA.

Purpose of RFP:

· To obtain Competitive bids
· To ensure quality Solution
· To select most Suitable vendor
· To reduce risks.

Q) What is Feasibility Study? Explain its types, Contents and purpose.

→ Feasibility study is the process of evaluating a project to determine whether it is technically, economically and operationally viable before development

Types:

1) Technical Feasibility
   - Checks availability of technology
2) Economic Feasibility
   - performs cost-benefits analysis
3) Operational Feasibility
   - checks whether system will work
4) Schedule Feasibility.
5) Legal Feasibility
   - ensures compliance with laws.

Contents:

- project description
- Requirement Analysis
- Technical requirements
- Cost estimation
- Risk analysis

Purpose:

1) Decision Making
2) Risk Reduction
3) Cost Control
4) Resource Planning.
